

# OAK LEAF GATES – Installation and Automation price guide

May 2008

To help you cost your particular project we have put together this short guide, using the gates that were shown on our award winning stand at Chelsea Flower show this year. This guide shows the costs that are involved in a typical installation, the only additional costs would be for access controls. All prices include VAT @17 1/2 %

**Automation	£980
<b>Total</b>	<b>£ 7,820</b>

\*The installation and automation prices quoted are purely a guide as every project is individual.

\*\* The automation price quoted for entrance gates is for the Frog underground automation system and for garage doors the price is for the VER system. Both these systems are shown in our automation brochure.

Access controls - the level of security required at the property entrance will dictate the nature of the entry system you have installed. As can be seen in our automation brochure we offer a wide range of systems from time-controlled pushbuttons to video and telephone entry systems. Each system is tailored to suit your own requirements and prices start from £350 rising to over £3,000 for a highly sophisticated system.

Please contact us by telephone, email or post for a specific estimate for your own project
